Portfolio: midnighttalehouse-star.github.io/ai-portfolio

RIGHT TO WORK Relocating to the UK mid-September 2026 on a Spouse Visa - full, unrestricted working rights, no sponsorship required.

PROFESSIONAL PROFILE

A highly disciplined former Military Officer and agile AI Product Builder specializing in the rapid prototyping, testing and deployment of end-to-end software solutions. Expert at leveraging advanced LLM development workflows (Claude Code), API integrations and low-code / no-code environments to translate complex operational concepts into working technology. Proven capability in managing source control, debugging backend logic and designing multi-agent automation pipelines. Combines 8 years of rigorous leadership, risk mitigation and cross-functional project execution with an elite, self-directed technical skillset. Based in Leicester and primed to bring immediate value, execution and technical agility to a progressive UK engineering or scrum team.

CORE COMPETENCIES

- **AI Engineering & Workflows:** Prompt Engineering, Multi-Agent System Design, Intelligent AI Routing, API Integration, custom LLM automation pipelines.
- **Languages & Frameworks:** Python (foundational), JavaScript, Node.js, React, Next.js, Electron, PowerShell, HTML/CSS.
- **Systems & Data Architecture:** JSON payload validation, REST APIs, automation pipelines (n8n / Make), system-wide data routing.
- **DevOps & Quality Assurance:** Version control (Git / GitHub), release management, end-to-end integration testing, technical documentation, logical debugging.
- **Leadership & Delivery:** Agile / Scrum execution, critical risk assessment, stakeholder communication, cross-functional team operations under pressure.

SOFTWARE PRODUCTION & SYSTEM DESIGN EXPERIENCE

Independent AI Product Builder

Remote | January 2025 - Present

- **Rapid software prototyping** - engineered and deployed complex cross-platform desktop applications within highly compressed timelines using AI-assisted development tools and structured prompt engineering frameworks.
- **End-to-end technical ownership** - ran systems analysis, defined application architecture, mapped user journeys and maintained full production cycles from code generation to user-facing deployment.
- **QA, code review & version control** - led release management with Git and GitHub, tested software workflows, validated JSON inputs and used AI-driven code reviews to isolate logic flaws and eliminate post-live vulnerabilities.
- **Workflow optimization** - built system-wide automation scripts and integration layers, cutting manual pipelines and ensuring secure, fault-tolerant data flow.

Featured Deployments

- **TubeForge AI Studio** (Live production - tubeforgeai.app): commercial desktop automation engine for Windows/macOS built with Electron, React, Next.js and Node.js. Integrated multi-LLM workflows, automated script-generation and external REST APIs for direct-to-platform content pipelines. Repo: github.com/midnighttalehouse-star/tubeforge-releases
- **ProxyConnect** (Network utility & automation framework): leak-proof Windows proxy validation tool using PowerShell and virtual TUN adapter routing. Built for automated data-parsing workflows with high fault tolerance, fail-safes and DNS-leak protection. Repo: github.com/midnighttalehouse-star/proxy_connect

LEADERSHIP & MILITARY EXPERIENCE

Captain, Pakistan Army

2017 - 2025

- **Project & operational management** - commanded large cross-functional teams to plan, coordinate and execute sensitive technical, logistical and training operations in fast-moving environments.
-

Risk mitigation & QA governance - ran daily strategic risk profiling, established operational quality controls and enforced compliance parameters to ensure total system readiness.

- **Technical translation & briefing** - converted high-level strategic objectives into granular, actionable instructions, bridging non-technical stakeholders and execution units.

EDUCATION & CREDENTIALS

- **Bachelor of Military Arts & Sciences** - National University of Sciences & Technology (NUST) / Pakistan Military Academy.
- **Commissioned Officer Graduate** - Pakistan Military Academy.
